10 October 1959

MEMORANDUM FOR: Deputy Director (Plans)

SUBJECT : Reduction of Agency Regulatory Material

1. For sometime this Office has been making a rather concerted effort to reduce the number of Agency regulations and to obtain greater clarity in those that are felt to be essential. Our progress to date has been somewhat encouraging, but we still have a long way to go if we are to accomplish any significant reduction in the volume of material on the books.

2. The elimination of one practice which has been followed over the past several years offers some promise in reducing the number of headquarters regulations.

5. I am of the opinion that this proposal is sound and will do much to eliminate unnecessary publication and distribution of material here at headquarters. If you concur with this proposal, we will take the necessary action to inform all recipients of regulatory material of the change, and will begin to implement it immediately.

(signed)  
L. K. White  
Deputy Director
